Falpi

From the very beginning, since 1987 Falpi has the clear ideas: to bring the enthusiasm and innovative spirit of a young and motivated team into the world of "professional cleaning".

Now, after more than 35 years of constant effort, we have added another quality which is just as important : the experience of a company with an in-depth knowledge of cleaning-related problems that knows how to solve them quickly and efficiently.

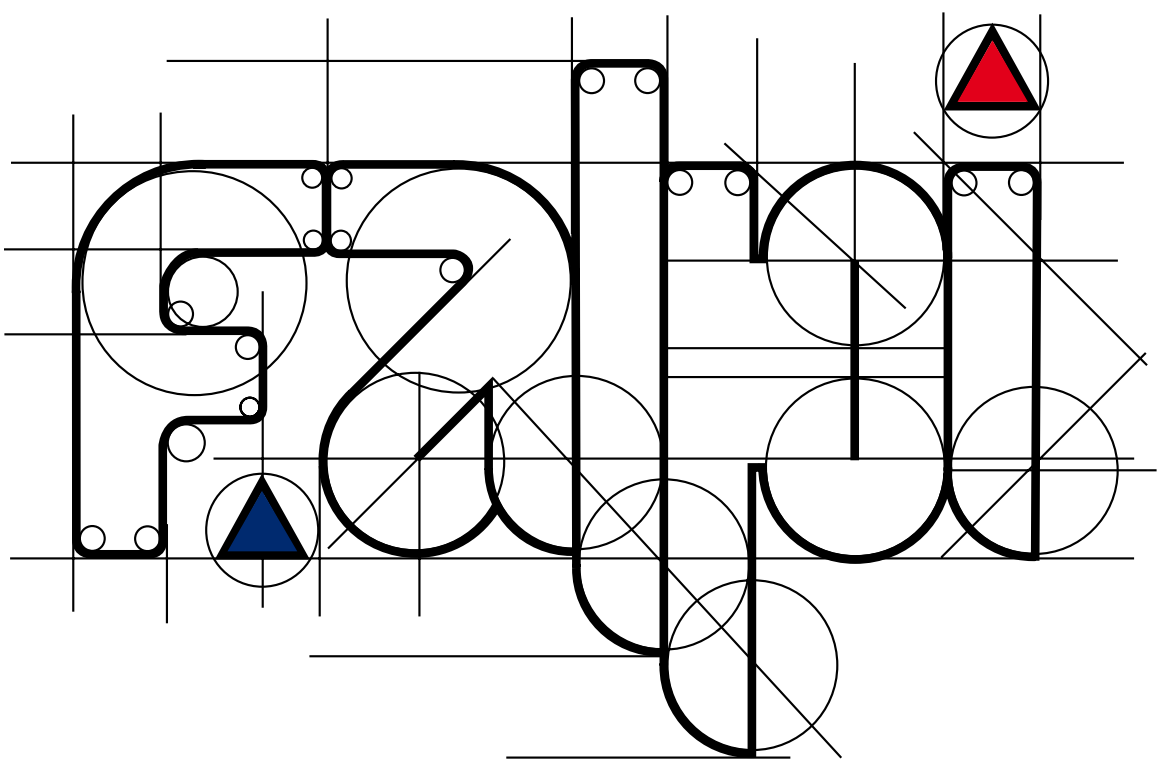
Quality First
made in Italy

01 - Falpi

Our Quality



In a world where everyone try to make the production abroad with a low cost of labour, Falpi choose to remain loyal to the quality of real "Made in Italy" protecting the Italian production value, its advantages on quality and the attention to the man and environment.
Qualities which for us are not just words, but represent the anchorages of a business ethic from the project to the achievement.

Falpi products, projected for cleaning companies, hospital, companies and communities, made following Customer demands are created only with materials completely recyclable.

Buying a Falpi product, you choose an highest quality item which can proudly wear the Italian flag because it is not only projected but, above all, made in Italy.

In Falpi we pay attention to the problem if Quality is linked just to the product and to production procedures.

So we figured out how today Quality means many things that all together, create a company/society/environment system in which we find our dimension and to which we contribute.

We are now aware that a company has the duty to deal not only with the market but also with the world.
A world that influences it and is on its turn influenced by it, that evaluate it, and which can be a source of health or, if bad-conducted, of "uneasiness".

We, therefore, believe that Falpi cannot be managed as a purely economic element and before choosing a product we have to assess its environmental and social impact.
These are the reasons why, today, all our efforts are aimed producing the best possible product, also to be in harmony with the principles which are at the basis of what we call "Social Quality".

Our principles:

- **Respect for the law**
- **Protect the Made in Italy**
- **Always operate commercially with full transparency**
- **Guarantee our proficiencies**
- **Respect for the environment**

01 - Falpi

Passion and Design for Cleaning

“We have found many partners worldwide who share our passion for their work, the quality of our products and the principles behind our choices.“

– THE FALPI TEAM

PRODUCT

This simple word includes two fundamental ideas: quality and strength.
So, every product must be conceived, designed and produced according to these clear goals and Falpi constantly strives to achieve its goals.

SERVICE

Over the years, we have invested heavily in customer care. This effort now means we can guarantee the very best service in terms of speed and accuracy.

ENVIRONMENT

Looking after the environment must guide our
actions: our environmental and social commitment is a question of lifestyle, a choice that we simply view as our duty.

SOCIAL QUALITY

At Falpi, we have realized that the concept of “Quality” encompasses multiple facets that, when combined, contribute to creating a system in which the company, society, and the environment coexist harmoniously. This system not only provides a satisfying work environment for us but also offers the opportunity to actively contribute to collective well-being.

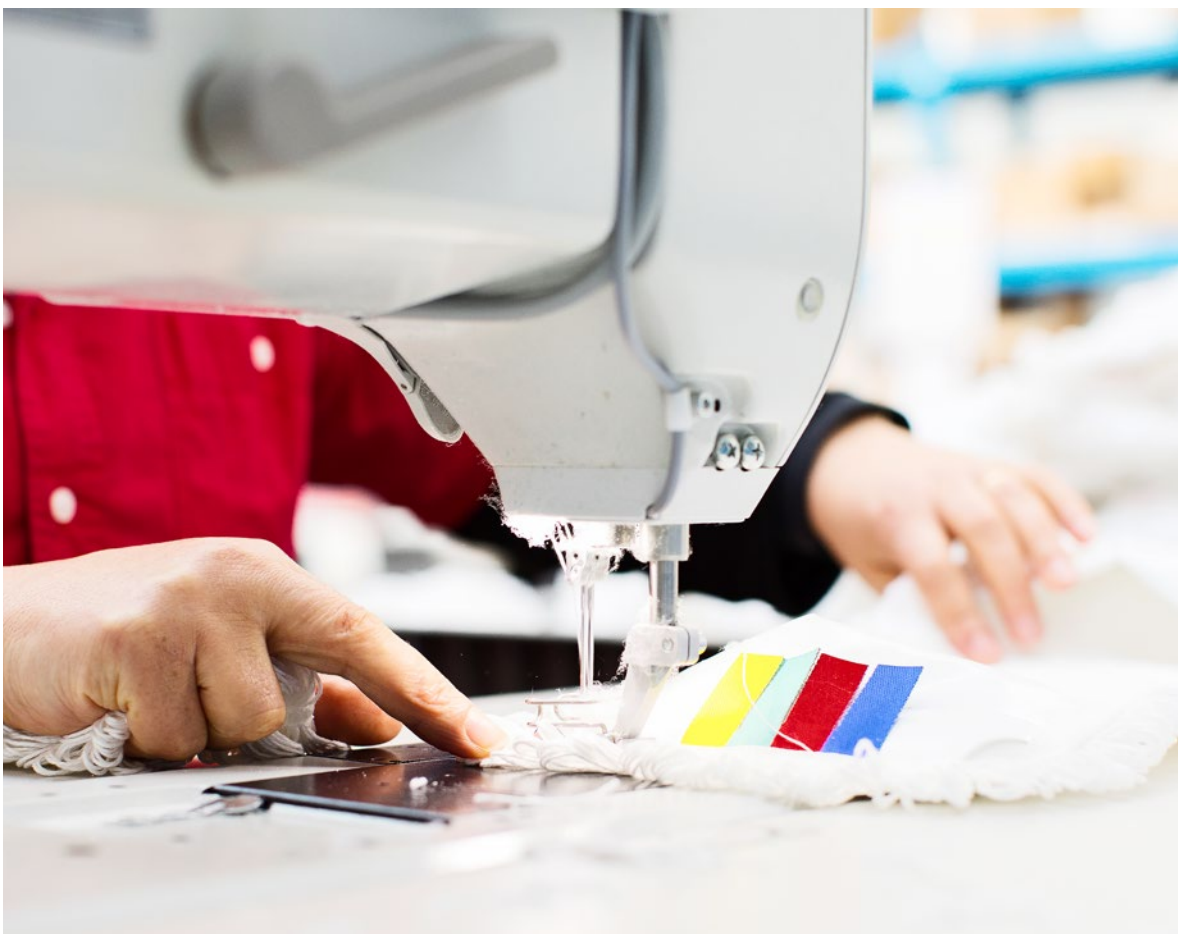
01 - Falpi

Production and Offices

CLEANING TROLLEYS

Falpi boasts a state-of-the-art mechanical production department. Here, our ideas take shape, transitioning from 3D CAD design to prototypes and eventually becoming industrialized products manufactured in series. The theme of sustainability also permeates this process, underscoring that every production activity is an integral part of a well-defined environmental policy.
Remarkably, 73 of our trolleys hold the EPD (Environmental Product Declaration) certification. This certification verifies adherence to eco-sustainable production processes, complete recyclability of the trolleys, and compliance with recent Ministerial Decrees (CAM).



TEXTILE PRODUCTS

In 1987, the year of Falpi's foundation, venturing into textile production marked the initial step into the professional cleaning industry. Today, that department, technologically advanced beyond its origins, stands as a fundamental part of our company. Being born in the Biellese region, the land of weavers, has allowed us, from the outset, to offer the market a product of absolute quality entirely manufactured in Italy. We firmly believe that Italian production is an indispensable added value, and over the years, it has positioned Falpi as an advocate for a "way of doing" and thinking increasingly focused on the enhancement of local specialized labor.

Our products are the benchmark for quality in the market, thanks to meticulous selection of raw materials, careful craftsmanship, and the passion we dedicate to our work. These are intrinsic values deeply rooted in our corporate culture, which, combined with respect for the dignity of workers, sets us apart in the market as a company where the words quality and sustainability are tangibly evident in the products.

EQUIPMENT

"*Whatever your challenge, choose the right equipment.*" This motto is not just a statement for us; it serves as a true source of inspiration and a guiding modus operandi that directs us every day. We commit ourselves to constantly stepping up to the plate, viewing each new challenge not only as a task to complete but as a tangible opportunity for growth and continuous improvement.

Our philosophy is not to complicate procedures but to simplify the daily lives of those involved in cleaning, offering tools and accessories specifically designed to meet the specific needs of each activity.

We believe that selecting the right equipment not only facilitates the work but can transform every challenge into an opportunity for excellence. With an approach focused on quality and innovation, we strive to provide solutions that not only meet current needs but also anticipate future ones, always keeping the goal of simplifying and improving professional cleaning practices at the forefront."

FALPI TEAM

Our design team constantly engages with the market to provide new and innovative solutions. We aim to stay ahead of the curve, carefully observing and expressing interest in emerging technologies and ongoing changes, with the intention of playing a leading role in these advancements.

Our approach extends beyond traditional cleaning products; we also propose and develop digital tools to support the work of our clients/users. Some examples of this commitment include our innovative tracking system Collega.Me based on iBeacon technology, our 3D configurators, and our Carbon Footprint Calculator. We strive to actively contribute to the evolving landscape by embracing new technologies and incorporating them into our offerings to enhance the overall experience for our customers.

Falpi Certifications

Much like any human activity, we too rely on the air, water, and land that surround us. These resources are at our disposal, but they are not limitless. They represent a capital that we must pass on intact to future generations, and such a commitment implies certain responsibilities for both individuals and businesses.

Protection, caution, and attention are the principles to apply if we want to reconcile economic development and future well-being.

The Falpi Team

The Falpi team stands out for the strong bond among colleagues, based on mutual respect and a constant desire for growth.

THE WORKSHOP

We are the ones who meticulously design and manufacture your cart in every detail

In this department, automation and expertise coexist and complement each other. Our team of Falpi mechanics, highly specialized in managing the latest machinery, is ready to address any specific request from large cleaning sites. In situations where a customized solution is sometimes necessary, the expertise of our team proves to be fundamental.

Fabio Luca Luca Nicolò

THE WAREHOUSE

Don't worry, we'll take care of getting your order to you

Not just quality in the product, but also in logistics! With over 1500 items always in stock, the preparation and real-time processing of orders can sometimes be a truly challenging task. Our warehouse staff, fast and efficient, are crucial to meet the timely demands of our customers.

ASSEMBLY OF TROLLEYS

We prepare and assemble your trolleys, paying attention to every single detail

Our trolley assembly team, capable of using the most advanced technologies to ensure maximum product quality, tackles each request with dedication and professionalism, paying attention to every single detail and offering tailor-made solutions when necessary. The expertise and experience of our team prove invaluable in every situation, ensuring the satisfaction of our clients.

Marco

Lorenzo

Gianfranco

Michele

THE MAINTENANCE DEPARTMENT

We take care of ensuring that everything works perfectly!

Every detail or issue is handled with care by the maintenance team, capable of always providing customized solutions to meet specific needs. Their expertise and dedication prove to be essential in every circumstance, ensuring the complete satisfaction of our Clients.

Gianluca

Fulvio

Lorenzo

THE TEXTILE LABORATORY

We sew your fringes and mop

Automation and the enhancement of craftsmanship in detail form an essential combination to ensure the highest quality Made in Italy. This translates into textile products that are extremely durable and highly effective in cleaning.

Concetta Roberta Milouda Aziz Donatella Nadia

THE SALES DEPARTMENT

We will handle each of your requests and provide you with support and assistance

Assistance, support, and solid relationships form the foundation for navigating the market, providing our customers with our experience and expertise.

THE MARKETING AND DESIGN DEPARTMENT

Every day, for us, is a new inspiration

The product design, planning, and management of corporate communication to the market, through the development of new ideas, are the elements that keep the company alive, proactive, and in motion!

Environment

Environmental protection is not an option, it's everyone's duty.

Protection, caution and care are the principles to apply if we want to reconcile economic development with future well-being.

The attention for the environment must guide our actions.

Falpi has made its environmental and social commitment a question of lifestyle, a choice that we simply consider our duty.

02 - Environmental

Ecovadis Silver Top

ECOVADIS SILVER TOP - 15%

Falpi achieved the ECOVADIS Silver Top certification in February 2024: a prestigious recognition that certifies the company's ongoing commitment to pursuing a virtuous path of corporate sustainability. ECOVADIS, one of the most important international platforms for assessing corporate sustainability, evaluated Falpi based on 21 aspects according to international CSR (Corporate Social Responsibility) standards, grouped into **4 key parameters: environment, worker and human rights protection, fair business practices, and sustainable purchases.**

ENVIRONMENT

The analysis of this parameter reflects the focus on reducing the environmental impact of its activities. Falpi ranks within the top 14% of the best companies evaluated by ECOVADIS in the Textile Production sector, positioning itself as a leader in the field of environmental sustainability.

PROTECTION OF WORKERS AND HUMAN RIGHTS

The analysis of these two aspects underscores Falpi's commitment to ensuring a safe, fair, and respectful work environment for all its employees. The Company has always been committed to promoting diversity, inclusion, and respect for workers' fundamental rights in all its activities. In this regard, Falpi ranks in the top 1% of the best companies evaluated by ECOVADIS in the Textile Production sector, thus highlighting its excellence in labor practices and human rights.

ETHIC

The result of the study of this parameter reflects Falpi's commitment to collaborating with suppliers who share its values of sustainability and social responsibility. The company actively promotes sustainable supply chains, working with partners who adopt ethical and environmentally responsible practices.

SUSTAINABLE PURCHASES

Ethics, the third parameter under evaluation, represents another fundamental pillar for Falpi, which adopts ethical policies and procedures that guide its decisions and actions, ensuring transparency, integrity, and legal compliance in all its activities.

02 - Environmental

Product Certifications

EPD - ENVIRONMENTAL PRODUCT DECLARATION

EPD is an environmental certification with the aim to supply concrete, checked and reliable information on the environmental performances of a product or a service. Following the regulatory perspective, it is defined as an Environmental Label of Type III. EPD analyses the entire cycle of life of a product or a service, from cradle to the grave.
For Falpi is a source of pride can declare to be the first company, in the cleaning professional sector, to take up the road of EPD certification of its product, according to the regulations ISO 14040. We have decided to have the range Microrapid, Microtech, Smart and Kubi trolleys certified EPD to demonstrate the top-level of environmental compatibility of our production.

CFP - CARBON FOOTPRINT

CARBON FOOTPRINT
CO_2 ISO 14067:2018

The Carbon Footprint is the sum of the greenhouse gas emissions that a product generates over its life cycle, for this reason the CFP study (CFP study) allows us to quantify the carbon footprint in terms of CO2 equivalent. The ISO standard that clarifies the consistency of the quantification, reporting and communication activities of the Carbon Footprint is ISO 14067: 2018.
The methodology underlying the Product Carbon Footprint is based on the principle of responsibility towards the environment and transparency in the communication of results.
For this reason Falpi has decided to make the emission values of the 73 previously certified EPD trolleys available to all Stakeholders and to undertake a path that will lead to an increasingly green and sustainable future.

ECOLABEL EU

EU ECOLABEL is the environmental label for the product of the European Community. In this context full of every brand and logo, this label qualifies products that go beyond a strict selection of environmental compatibility criteria determined by European Community.
The EU ECOLABEL, based on ISO 14024 regulation, is described by the Nation Action Plan of Green Public Procurement (PAN GPP) as "*...a main reference...*" for cleaning products assessment more respectful for the environment. This label is often confused with other environmental label type 1 of National nature (mainly used in other countries of the European Community), EU ECOLABEL is the one well recognised and common in Europe.
We decided to certify with EU ECOLABEL 277 textile products, and 5 models of wheeled cabinet with a process which took on our Quality Office for more than four years in a long and demanding way. For Falpi this certification is not just a simple mark on a product, it is not just a "label", but the result of a constant modus operandi which involves the company and its policies. Do not make the mistake to consider certifications as the arrival point they are just the beginning of a long way!
Identifying a product certified EU ECOLABEL is easy: you can identify it by the typical logo with the flower and you prove its validity on the website
https://www.isprambiente.gov.it/it/attivita/certificazioni/ecolabel-ue/prodotti-certificati

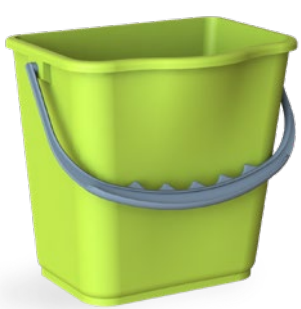
TEXTILES ECOLABEL EU

KUBI WHEELED CABINET ECOLABEL EU

REMADE IN ITALY

ReMade in Italy is the only accredited third-party certification that is aimed at all products and materials in Italy. For this reason, having the ReMade in Italy certification entails concrete advantages for participation in public tenders. The "high level" promotion takes place through the issue of certification: the product is an expression of the maximum guarantee of a production that takes place in compliance with legislation and the environment.

ReMade in Italy carries with it a double message: on the one hand, it fully expresses the concept of the Circular Economy, that is the material that is recreated with the minimization of waste; at the same time, there are other environmental aspects related to recycling that Remade in Italy values and accounts for: saving CO2 emissions into the atmosphere and energy efficiency related to recycling. At Falpi, we were the first in the professional cleaning sector to certify our dry plastic containers, with high percentages of recycled material, Remade in Italy. Made in Italy, innovation, sustainability, aesthetics and functionality have always been part of all our projects, and environmental commitment is one of the first aspects that we take always into consideration.



02 - Environmental

System Certifications

ETHIC CERTIFICATION

Falpi best characteristic is the respect for the dignity: in a market even more competitive, where despite the rule of civil life, there are manufacturers who consider the exploitation of manpower as a qualifying aspect in their capacity to contract, Falpi chooses to be certified Certification SA 8000: 2014.
Falpi shows in this way, to all the parties involved (employees, companies, suppliers and financial backers) its ownundertaking in pursuing practices, procedures and policies which may ensure a behaviour that is not detrimental to the person's dignity.

QUALITY CERTIFICATION

For Falpi quality is an attitude which involved all the tasks of the company and translates into its policy, characterized by ongoing improvement and full transparency.
With ISO 9001 certification, Falpi guarantees its customers qualified products and services, which are continuously supervised, from the design through the whole production cycle, and perfectly meet the technical specifications for their use in the different application sectors.

ENVIRONMENTAL CERTIFICATION

The impact of our quality: the best on your work, zero on the environment! The approach of the company to the environmental themes is clearly identifiable in the range of inox trolleys: products with highest quality and technology, designed to meet Customer's demands, which are produced with material and processes with zero environmental impact and, therefore, after a very long working life,100% recyclable. The Environmental Certification ISO 14001:2004 offers a structured approach to define the environmental objectives and the identification of the instruments necessary to achieve them.

GENDER EQUALITY

Falpi has achieved Gender Equality certification in compliance with UNI/PdR 125:2022. This recognition confirms the adoption of practices to ensure equal opportunities for employees, reinforcing a company culture based on respect, inclusivity, and gender equality.

02 - Environmental

Environmental Awards

CLEAN GREEN AWARD

ECOLABEL EU

NATIONAL AWARD 2017

The Clean Green Award Afidamp is the annual recognition of products, systems or services, of the professional and industrial cleaning sector, with a strong environmental aim. In 2009 Falpi was awarded in the equipment category, with the **Microrapid 2** trolley (the first trolley with environmental certification EPD).

In 2010 and 2011 edition Falpi was named with in the Mention of Merit of the jury and described as "*...the company driver in the sector of the professional cleaning in the environmental field*." In 2014, for the fourth contest edition, our environmental aim has been again a warded with the reward of the new microfibre Ultrarapid Ecolabel EU wet-mop.
During the 25th anniversary of the Ecolabel brand, Ispra (Higher Institute for Environmental Protection and Research) rewarded the company with the 2017 EU Ecolabel National Award:
"*The study and application have led to combine the philosophy of the brand with an avant-garde design: the result is an innovative and patented product, able to reduce wear and increase resistance and cleaning efficiency, respecting sustainability and a lower environmental impact during the entire life cycle*".

ECOLABEL EU NATIONAL AWARD 2020

On the occasion of the event held on November 24, 2020 Ispra (Higher Institute for Environmental Protection and Research - Ecolabel section) wanted to reward our company "*For the best design innovation for reducing environmental impact*", with the following motivation : "*The study and application have led to combining the philosophy of the brand with the avant-garde design, following the creation of the yarn throughout the production chain: the result is an innovative and patented product, capable of reducing wear and increase resistance and cleaning effectiveness, always respecting sustainability and with a view to lower environmental impact during the entire life cycle, also with an interest in the principles of social responsibility*". This award was given to the Falpi wet-mop **Mikro K**.

ECOLABEL EU NATIONAL AWARD 2021

On Tuesday 28 October 2021 on the occasion of the Ecomondo Fair in Rimini, we were awarded the prestigious EU Ecolabel Emas award with the motivation:
"*The company has nominated the Kubi Pro Big-Foot Mobile Cabinet for professional cleaning, recently certified EU Ecolabel. Item characterized by physical resistance performance and exceptional stability.*
It is innovative as it is made with materials that lead to positive impacts on the environment, through the greatest possible extension of the product life cycle, without burdening production costs.
The Mobile Cabinet is designed for disassembly, allowing for repair, reuse and recycling.
This product is unique and innovative in the world of professional cleaning, in fact Falpi Srl is the only company in Italy to have certified the EU Ecolabel for this type of product". This award was given to the Falpi model **Kubi Ecolabel**.

ECOLABEL EU NATIONAL AWARD 2022

On the occasion of the event "Ecolabel Award 2022 - Fifth edition "30 years of the EU Ecolabel Balances and perspectives" held in Rome on 14 October 2022 at the headquarters of the Italian Geographic Society Ispra (Higher Institute for Environmental Protection and Research - Ecolabel section) wanted to reward our company for effective dissemination and promotion of the EU Ecolabel for products certificates.

Digital Tools

Our design team consistently engages with the market, scrutinizing emerging trends, analyzing user needs, and probing industry dynamics, with the aim of providing new, innovative, and cutting-edge solutions.

We always strive to stay ahead of the curve by carefully observing and showing interest in new technologies and ongoing changes, with the aim of playing a leading role. Our approach extends beyond traditional cleaning products; we also propose and develop digital tools to support the work of our clients/users.
In response to this vision, we have created innovative systems such as Collega.Me for cart tracking, 3D Configurators, and the Carbon Footprint Calculator.

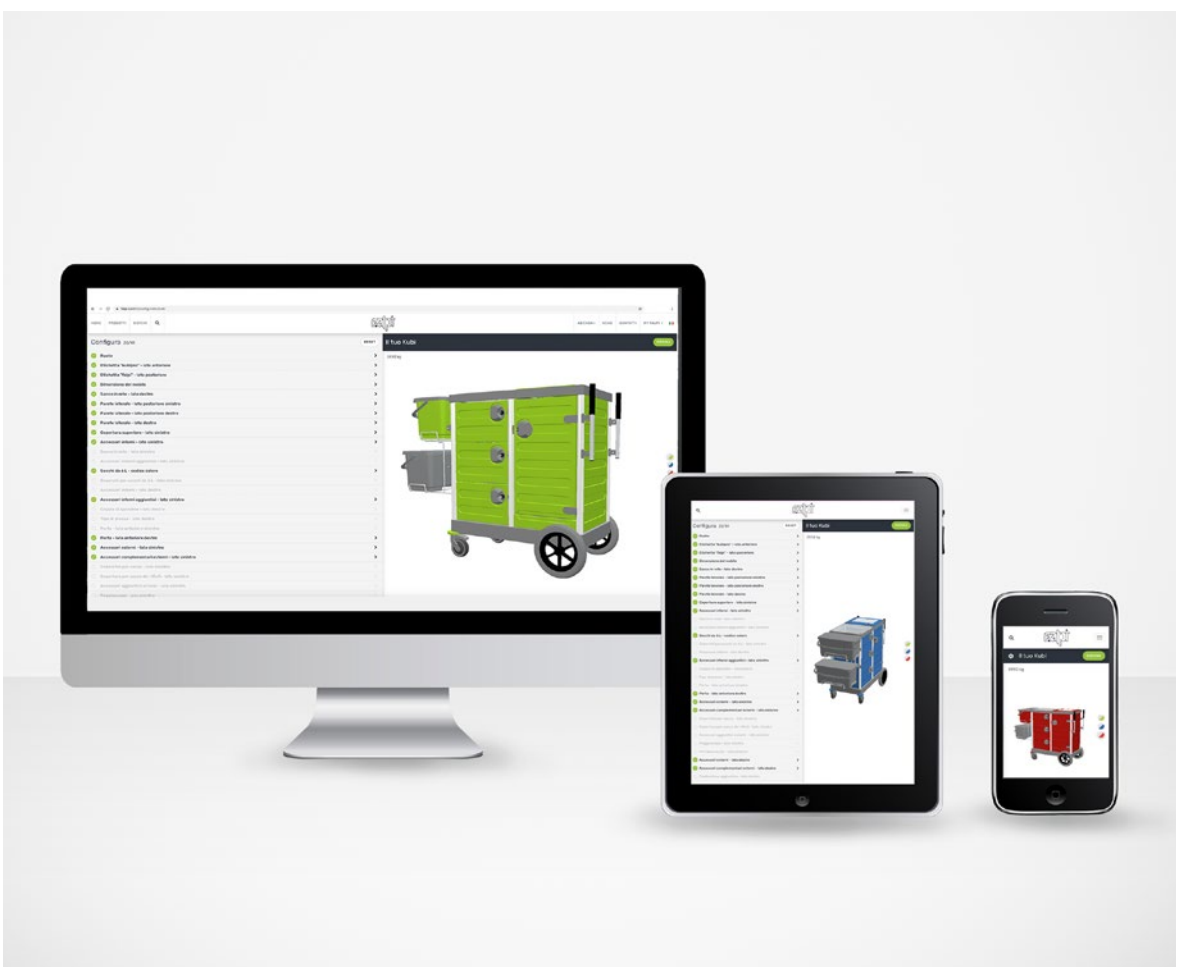
Falpi Configurators

The Falpi configurators allow you to create your own trolley in a few simple steps, right up to the order request.

https://www.falpi.com/en/systems/systems/it-cleaning-systems/configurator



Create your trolley in a few simple steps, up to the order request, by selecting the components from those available and verifying their technical characteristics. The first step is to choose the family of trolleys that you want to customize (KubiPro, Soli or Solight Housekeeping).
Once the choice of the family has been defined, it is possible to select the components among those available, checking their code and description. It is an intelligent tool because, based on the selections made, it automatically excludes all non-feasible combinations.
During the configuration, the user sees in real time the construction of the trolley in 3D based on his selections (not available for the trolleys of the Solight Housekeeping range).
Once the configuration is complete, you can request a quote directly, or send an order.
With this tool, practical, quick and easy to use, you can configure the trolley according to your needs and requirements in a completely autonomous way.

The configurator is freely accessible.

Upon request, our Commercial Service can provide you with the authorization to view prices.

Carbon Footprint Calculator

Configure your Kubi-Pro, Kubi Fun or Soli trolley and calculate in real time its environmental impact accessing our reserved area

The development of the new configurators of Kubi-Pro, Kubi-Fun and Soli trolleys, has generated a big news: the Carbon Footprint Calculator.

By logging in to My Falpi reserved area with a *Pro Account* it is possible to configurate your custom trolley and view the environmental impact of the configuration according to the ISO 14067 standard.
The method of calculation of Falpi Configurator is useful to have an immediate assessment of the capacity to reduce the environmental impact, operating an aware choice upon the trolley's composition. The CFP Calculator is in addition to the available tools for the designers logged in MyFalpi platform.

Beyond the 73 CFP ISO 14067 certified trolleys, the designers have the possibility, in real time, to operate conscious choices for optimal management of their environmental impact during cleaning activities.

Once the trolley has been customized according to your needs, it will generates a report with all the technical details and the global warning potential (GWP) of the configuration. The environmental impact, in terms of equivalent of Co_2 emissions, will be calculated on the basis of all the components and a possible packaging.

With the aim of providing exhaustive data, we introduced the possibility to calculate the transport impact. During the configuration, you will also have the possibility to choose the means used to carry the trolley, define different itineraries and set the km to go.

CollegaMe

03 - Digital Tools

CollegaMe

COLLEGA ME, the smart system by Falpi.

For Falpi, innovation means simplification: we want to make yesterday's job easy, simple, quick and efficient, in preparation for future challenges.
CollegaMe is Falpi's cloud platform for the "smart" management of a series of operations which are essential for tomorrow's cleaning company.
CollegaMe allows you to analyse, in real time, the position and the route of trolleys, cleaning machines and articles you want to monitor. You can easily communicate with operators, send and receive information, work instructions and alerts automatically, only when and to whom required. You can ascertain in real time where cleaning procedures have been finished. CollegaMe works both indoors than outdoors thanks to iBeacon and Gps technologies.

We give access to the CollegaMe platform only to cleaning companies which use our products. It is a new way to support those companies which appreciate the way we work!

CollegaMe allows you to:

- track the real-time position of trolleys, machines and articles
- view movements in real time on indoor maps (previously uploaded by the user) or outdoor on google maps
- send and receive notifications, pictures, alerts and information
- automatically send work instructions when, where and to whom required
- remotely check the beginning and the end of shifts
- extract customised reports which can be revised

... and much more!

WHAT YOU NEED?

BEACON

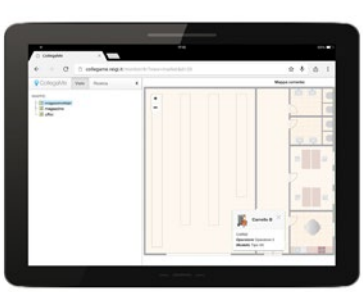
Self-powered BLE (Bluetooth Low Energy) transmitters.

APP

Collega.Me
Application installed on the mobile device (Android).

PIATTAFORMA

Collega.Me Cloud
By means of a Web Application you can access the maps of the cleaning site with username and password.



Sweeping

Sweeping system and surfaces mopping.

For cleaning of the floors it is essential, before washing, a careful sweeping of the surfaces, to get excellent results.

Originally created for the sanitary sector and now used for cleaning every kind of location, sweeping and dusting systems, in the “disposable” or
re-usable versions, are technically and economically the most efficient solutions for cleaning small and large surfaces catching dust and dirt of all kinds. Easy learning to use, reduced physical exertion, low dispersion of dust in the air and excellent efficacy are the strong points which have contributed to the wide diffusion of flat sweeping system. Falpi range for flat sweeping offers the most professional articles available on the market: in addition to the classic cotton fringe it is now available in microfibre MICRODUST, a complete range of impregnated cloths, tools and frames of every kind, everything severely “Made in Italy”.

46 - 51 Sweepy
52 - 57 Damp Sweeping
58 - 63 Surfaces Dusting

Smart

04 - Sweeping

Sweepy

The threads of the dust-mops reach everywhere, even in the most difficult points like coins and edges too, reducing the dispersion of the dust into the environment. It is possible to fit a hemmed gauze with holes in it for a more accurate “dry” and “wet” cleaning.

The mopping is the classic and low-cost method, fast and efficient, to clean small and large surfaces.

COMPONENTS

FOLDING FRAMES / FIXED FRAMES

Folding frame, with plate and plastic join, is available in 40-60-80-100 cm sizes. Fixed metal frames are available in 110-130-160 cm for wide surfaces and to improve the performance.

MOPS WITH LACES CLOSURES / MOPS WITH POCKETS

Sweepy refills are available in microfibre, cotton or acrylic (blue fringe). All the Sweepy dust-mops (cotton, acrylic, microfibre) are available with pockets or with laces closures.

04 - Sweeping

Damp Sweeping

The easiest, the best method, irreplaceable for total dust removal from surfaces. Lighter frames reduce physical force on the part of the cleaning worker with the best performance and the minimum effort.
The impregnated cloth collects and retain dust, hairs and all types of impurities absorbing it into its own weft thanks also to the mechanical action of the supporting frame. In order to make the operations easier reducing the obstacles, has been created Dual-Tech: a single tool for sweeping and washing.

COMPONENTS

DUALTECH FRAME

Dual-Tech frame a single tool for two activities.

ALU-WING & ALU-TECH FRAMES

The Alu-wing aluminium frame allows excellent sliding over the floor. Thanks to its washable pad it keeps the gauze in the correct position even in the presence of irregular floorings.

IMPREGNATED CLOTH

The impregnated cloths certified EU Ecolable, are available flat or in practical or in pre-cut rolls.

DUALTECH FRAME

Two in one.

Dual-tech allows you to use the same equipment both for sweeping and washing, it simplifies cleaning operations and reduces the obstructions.
Light and strong, thanks to its soft rubber tubular sheets, Dual-Tech allows to dust efficiently floors and, soon after, to be used for washing with microfibre mops. Unique and patented it can be used by washing methods MIcrorapid and Microtech.

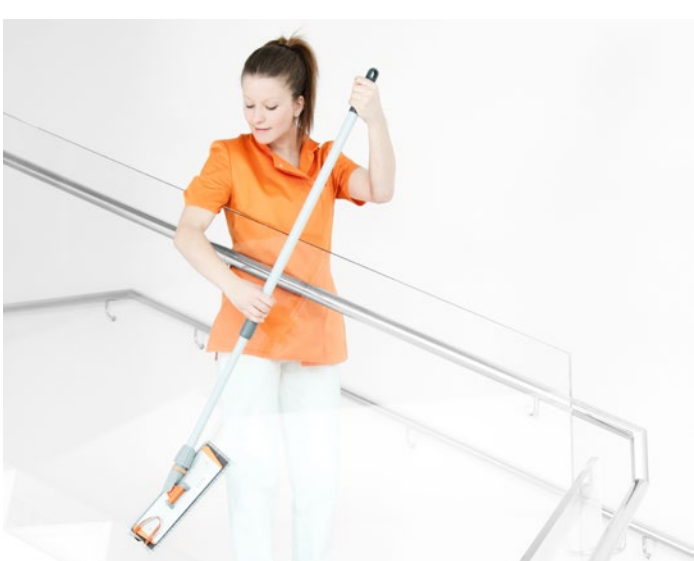
Use Dual-tech both with impregnated cloths and with microfibre mops: you will save, time and space.
By SWEEPING soft tubular sheets let fit the impregnated cloth to the floor for a perfect cleaning.
A thin hooked slat keeping the cloth in the right position.

04 - Sweeping

Surfaces Dusting

Not often considered for its real importance the operation of “dusting” surfaces is actually essential to guarantee true environmental hygiene.
HB BILL is useful and efficient on smooth surfaces both vertical and horizontal.

Tables and desks, doors and mirrors, windowsills and walls can be cleaned in a while and with great eficiency.



COMPONENTS

BILL & HB BILL FRAMES

Bill and HB Bill frames helps the mops reducing time and strain.

BILL CLOTHS & MICROTECH MOPS

The Bill cloths in ultra-microfibre allow washing and drying surfaces in one wipe. The Microtech microfibre mops is used for a first rough cleaning the dirt from the surface before the use of the fringes Bill.

MICROFIBRE CLOTHS & DUSTERS

Microcloth the more used in the healthcare scope:

- ORANGE cloth for dry cleaning dust or greased.
- SILVER cloth the best to wet cleaning of sanitary fixture.
- BLUE cloth the “expert” for glasses and mirrors.

Washing

A complete range of products to satisfy every demand of "professional cleaning".

The cleaning professional want the best, and a professional range must offer the right solutions for all the demands.

The different types of flooring, different sectors of application, grade of dirt to be removed, different kind of detergents frequency of cleaning and the demands of the customers are the fundamental elements which determine the choice of the right equipment for the need of the moment.

Besides the more traditional washing methods such as the cotton mop, in Falpi's Washing range we further find the new microfibre mop MICROWASH, and a complete selection of wet-mops for flat surface washing.

05 - Washing

H_2O Washing

Washing with Kentucky mop is the traditional washing system, easy to use, suitable both for large and small surfaces.

Increasingly it is found in its ideal application on very heavy and accumulated dirt.

CUT-END MOPS

LOOPED-END MOPS

COMPONENTS

MOP-WRINGER H_2O & PLASTIC MOP HOLDER

The plastic mop wringer for Kentucky Mop or flat mop, strong and designed.
The plastic mop-holder for Kentucky Mop and for every kind of handles.

MOP FIXED HOLDER & KENTUCKY MOP

Cut-end mops are recommended for rough surfaces and floors.
Looped-end mops are ideal to collect dirt and prove more resistant to use and washing.

05 - Washing

Flat Washing

Falpi put the first roll press on the Italian market in 1989
(during the exhibition “Pulire” in Bari), since then flat washing has been the most used system in all environments. The great yield and optimal results make it indispensable not only in the sanitary sector, since flat washing is ideal to remove every kind of not too deep dirt.

Frame are fitted with button or wing fixing systems and allow wringing the wet-mops without these coming into contact with hands, for maximum safety and great comfort.

COMPONENTS

FRAMES FOR FLAT WASHING

MULTI-CLACK and CLACK frames are fitted with pedal release which make it easier to use.

CLACK WET-MOPS & MULTI WET-MOPS

MULTI and CLACK wet-mops are available in the version specialmix (white and grey) and in microfibre.
The continuous fringes (bouclé) are ideal to capture and retain dirt thus ensuring higher resistance to use and washing.
The area/colour code label allows choosing the different wet-mops by application areas.

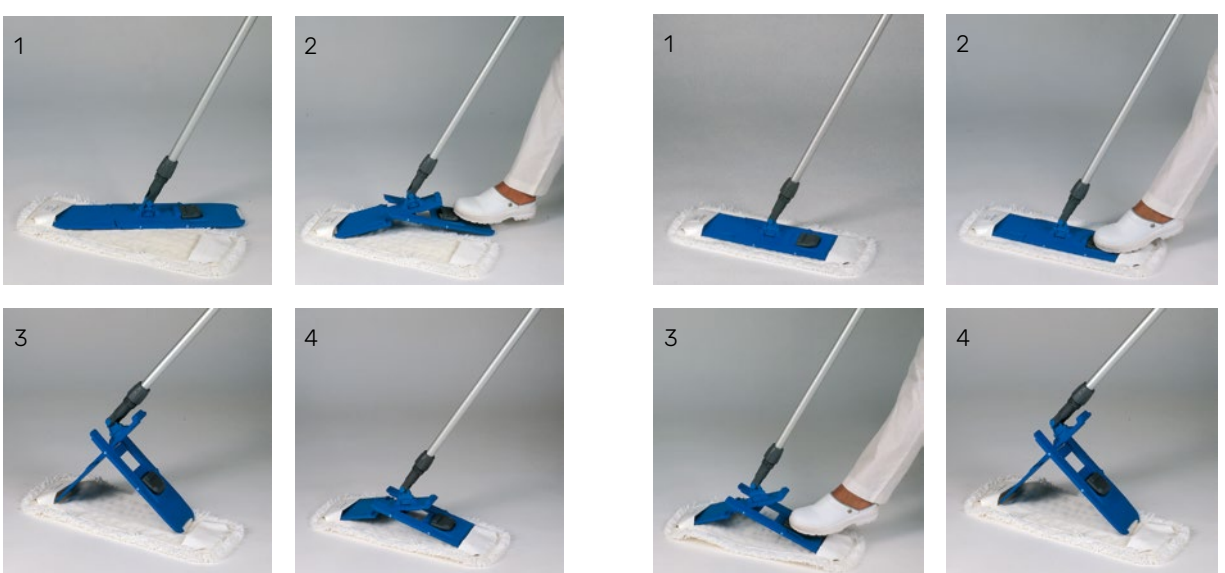
05 - Washing

Rapid Washing

In the healing sector the hygiene is really important: for this reason Falpi invests in research in developping methods even more efficient for hospital cleaning.
The RAPID system, the “classical” double passage washing system for hospital and healthcare. Pure cleaning solution, quick use and high quality are its strong points.
RAPID wet-mops are appreciated for their unbeatable resistance to repeated washing achieved thanks to the quality of the materials used in production.



COMPONENTS

RAPID FRAMES

The RAPID frames are made of resistant plastic material. Its pedal coupling/ release device is practical and efficient. They are available in the sizes 40x11 and 50x13 cm (with small wheels at the end to ensure an easy fixing of the wet-mop).

RAPID WET-MOPS & ECORAPID WET-MOPS & JACKY WET-MOPS

The continuous fringes (bouclé) are ideal to capture and retain dust thus ensuring higher resistance to use and washing.
Rapid wet-mops are available in specialmix (white ad grey) and in microfibre version. The area/colour code label allows choosing the different wet-mops by application areas.

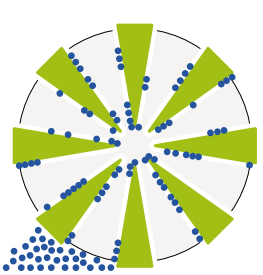
05 - Washing

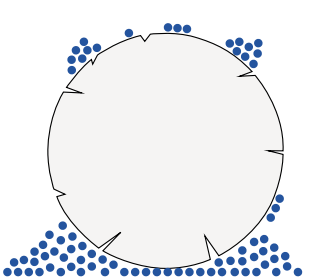
Microrapid Washing

It's been over fifteen years from the first presentation of MICRORAPID WASHING SYSTEM. Today, as in the past, we have the qualitative primacy of a teaching method which, above
all thanks to the quality of the microfibre used by Falpi, is the point of reference of the professionals of the sector.
Microfibre is the word used in the textile sector to define those fibres with count lower or equal to 1 Dtex (decitex). Dtex is the weight in grams of 10000 metres of yarn, this means that one gram of microfibre can cover (at least) a 10 km distance.
Yarns are extremely "thin", becoming the most efficient in the cleaning operations.
The microfibres used in the cleaning sector are produced using nylon and polyester bi-component. The intrinsic structure increase the fibre "usable surface", thus allowing dirt to to penetrate inside and then to be captured and retained. Microfibre attracts dirt by means of electrostatic action when it is dry and by mechanical and capillary action during wet washing.

MICROFIBRE



COTTON FIBRE



COMPONENTS

MADE IN FALPI

All wet-mops produced by Falpi are identifiable by a sewn label which certifies its origin. The serial number allows identifying the production date of the wet-mop.

FRAMES

Aluminium frame, practical and easy to use. Its lightness makes it less tiring to use and suitable for washing vertical surfaces.

MICRORAPID WET-MOPS & MICROTECH WET-MOPS & ULTRARAPID WET-MOPS & GRATTINO WET-MOPS

Microfibre wet-mops are available with backing cloth LOOPFIX and HONEYCOMB 3D in different colors.
The continuous fringes (bouclé) are ideal to capture and retail dirt thus ensuring higher resistance to use and washing.

WHERE TO USE

WHERE?

- Restaurants
- Toilettes
- Healthcare Facilities
- Offices
- Fitness/Wellness Centers
- Schools/Kindergartens
- Companies
- Swimming Pools
- Spa
- Campings

Daily Kit

Daily cleaning kit for the sanitization in confined and high risk of infection areas.

The kit, contained in a carton box, is made up of:

- one frame with carton handle with polypropylene joint, easily packable after the use;
- 1 roll of Monopanno (code 2000450) for dusting of surfaces;
- 10 disposable wet-mops (cod. 0468240 or cod. 0468260) for washing floors, to soak at the moment;

Light Products

Falpi has studied the Light range for those who do not need the performances of a professional article, without renouncing its convenient use. Light products have a very strong quality-price ratio.
Light range is a selection of the most popular items for a non-strictly professional use; it is perfect to partecipate in tender notices, ensuring the quality of Falpi products.

Washing Instructions

It is simple to guarantee a Falpi textile product great efficiency over a long period: it is enough just to follow some practical advice. There follows a quick guide to consult when doing first washes and at any time when doubts or problems may arise.

WASHING INSTRUCTIONS FALPI TEXTILE PRODUCTS

ICONS ON THE LABEL ABOUT WASHING INSTRUCTIONS

- Wash the news textile before using them the first time
- The washing phases (pre-washing, washing, rinsing, and spinning) must be respected and not modified or “skipped” by operator
- Pre-washing must be done solely with water, so as to remove all trace of disinfectant or detergent
- Do not use fabric softeners during the wash
- When washing pay scrupulous attention to the instructions given, in particular to how much detergent is used and to the water temperature
- Avoid, when possible, the use of dryers
- Always respect the load quantity recommended for the washing machine used

Legend

Normal wash max temperature 30°

Normal wash max temperature 60°

Normal wash max temperature 90°

No dry-cleanable textile

Only bleach with oxygen based - do not use chlorine di-oxine based

It is unable to be treated with chlorine

It cannot be dried in hot air in tumble drier

Handles and Frames

Quality in details.

Our handles and frames are characterized by the use of fine materials such as the aluminium, fiberglass and nylon.
They are used, day by day, by cleaning operators who appreciate their strength, right balance, lightness and beauty.

Kubi Trolleys

The generation of modular trolleys, completely user-adjustable.

A new concept of closed trolley: a resistant, compact and aesthetically attractive structure, which includes all Falpi's experience and reliablity.

An accurate choice of raw materials to obtain a unique product, just like all our trolleys. KUBI is modular, can be converted, if needed, and designed to be long-lasting. It is the perfect solution wherever the trolley needs to hide its content: shopping centres, schools and offices can now count on a product which has been specifically designed for their needs.

106 - 109 Choose your base & Configurators
110 - 137 Kubi-Pro
138 - 141 Kubi-Box and Kubi-Box Minimal
142 - 149 Kubi-Fun
150 - 151 Soli & Soli PRO
152 - 153 Senior Care System
154 - 155 Kubi Special - i-Kubi and Kubi Robot
156 - 161 Kubi Kid Stickers and Customizable Forex panels
162 - 163 Kubi Ecolabel
164 - 171 Wheels and Optionals

Choose your Kubi base size

The range of KUBI trolleys allows you to choose between 3 different basic models: *Large*, *Medium* and *Small*.

The ***Large*** base (with a size of 87x47x9 cm) is used in the models of the Kubi Pro range.

The ***Medium*** base (with a size of 68x47x9 cm) is used in the models of the Kubi Fun range.

The ***Small*** base (with a size of 46x46x5 cm) is used in the models of the Soli and Soli Pro range.

08 - Kubi Trolleys

Kubi Pro, Kubi Fun and Soli configurators

The Falpi configurators allow you to create your own trolley in a few simple steps, right up to the order request.
Create your trolley in a few simple steps, up to the order request, by selecting the components from those available and verifying their technical characteristics. The first step is to choose the family of trolleys that you want to customize (KubiPro, Soli or Solight Housekeeping).
Once the choice of the family has been defined, it is possible to select the components among those available, checking their code and description. It is an intelligent tool because, based on the selections made, it automatically excludes all non-feasible combinations.
During the configuration, the user sees in real time the construction of the trolley in 3D based on his selections (not available for the trolleys of the Solight Housekeeping range).
Once the configuration is complete, you can request a quote directly, or send an order.
With this tool, practical, quick and easy to use, you can configure the trolley according to your needs and requirements in a completely autonomous way.
The configurator is freely accessible.
Upon request, our Commercial Service can provide you with the authorization to view prices.

kubipro

LIGHTNESS
The plastic and aluminium structure makes the trolleys both light and resistant.

ENDURANCE
Aluminium brackets, screws and accessories are made in stainless steel.

ELEGANCE
Simple and modern design enhance a sober and refined appearance.

MANOEUVRABILITY
Wheels, mounted on ball bearings, are suitable for more challenging paths.

NEW

Push and Go KIT

A useful accessory designed to enhance the user experience of Kubi Pro trolleys equipped with Big-Foot wheels: the brake *Push & Go*.
This component combines practicality, safety, and durability to meet the needs of operators involved in cleaning activities in locations where it's essential for the trolley to be consistently braked when not in use. Ideal for airports, stations, shopping centers, and any crowded area where there's a real risk of accidental trolley movement due to congestion.

Brake release system on the handle

Robust stainless steel design with integrated handle and locking lever

Brackets connected to the wheels for added strength

The key feature of the *Push & Go* kit is the lever for unlocking the normally braked wheels. The lever is positioned so that simply by resting your hands, the movement of the trolley is effortlessly released, while still providing complete control over its mobility.

The *Push and Go* brake can be used with all KubiPro trolleys (Large base) equipped with double cabinet and Big-Foot wheels.

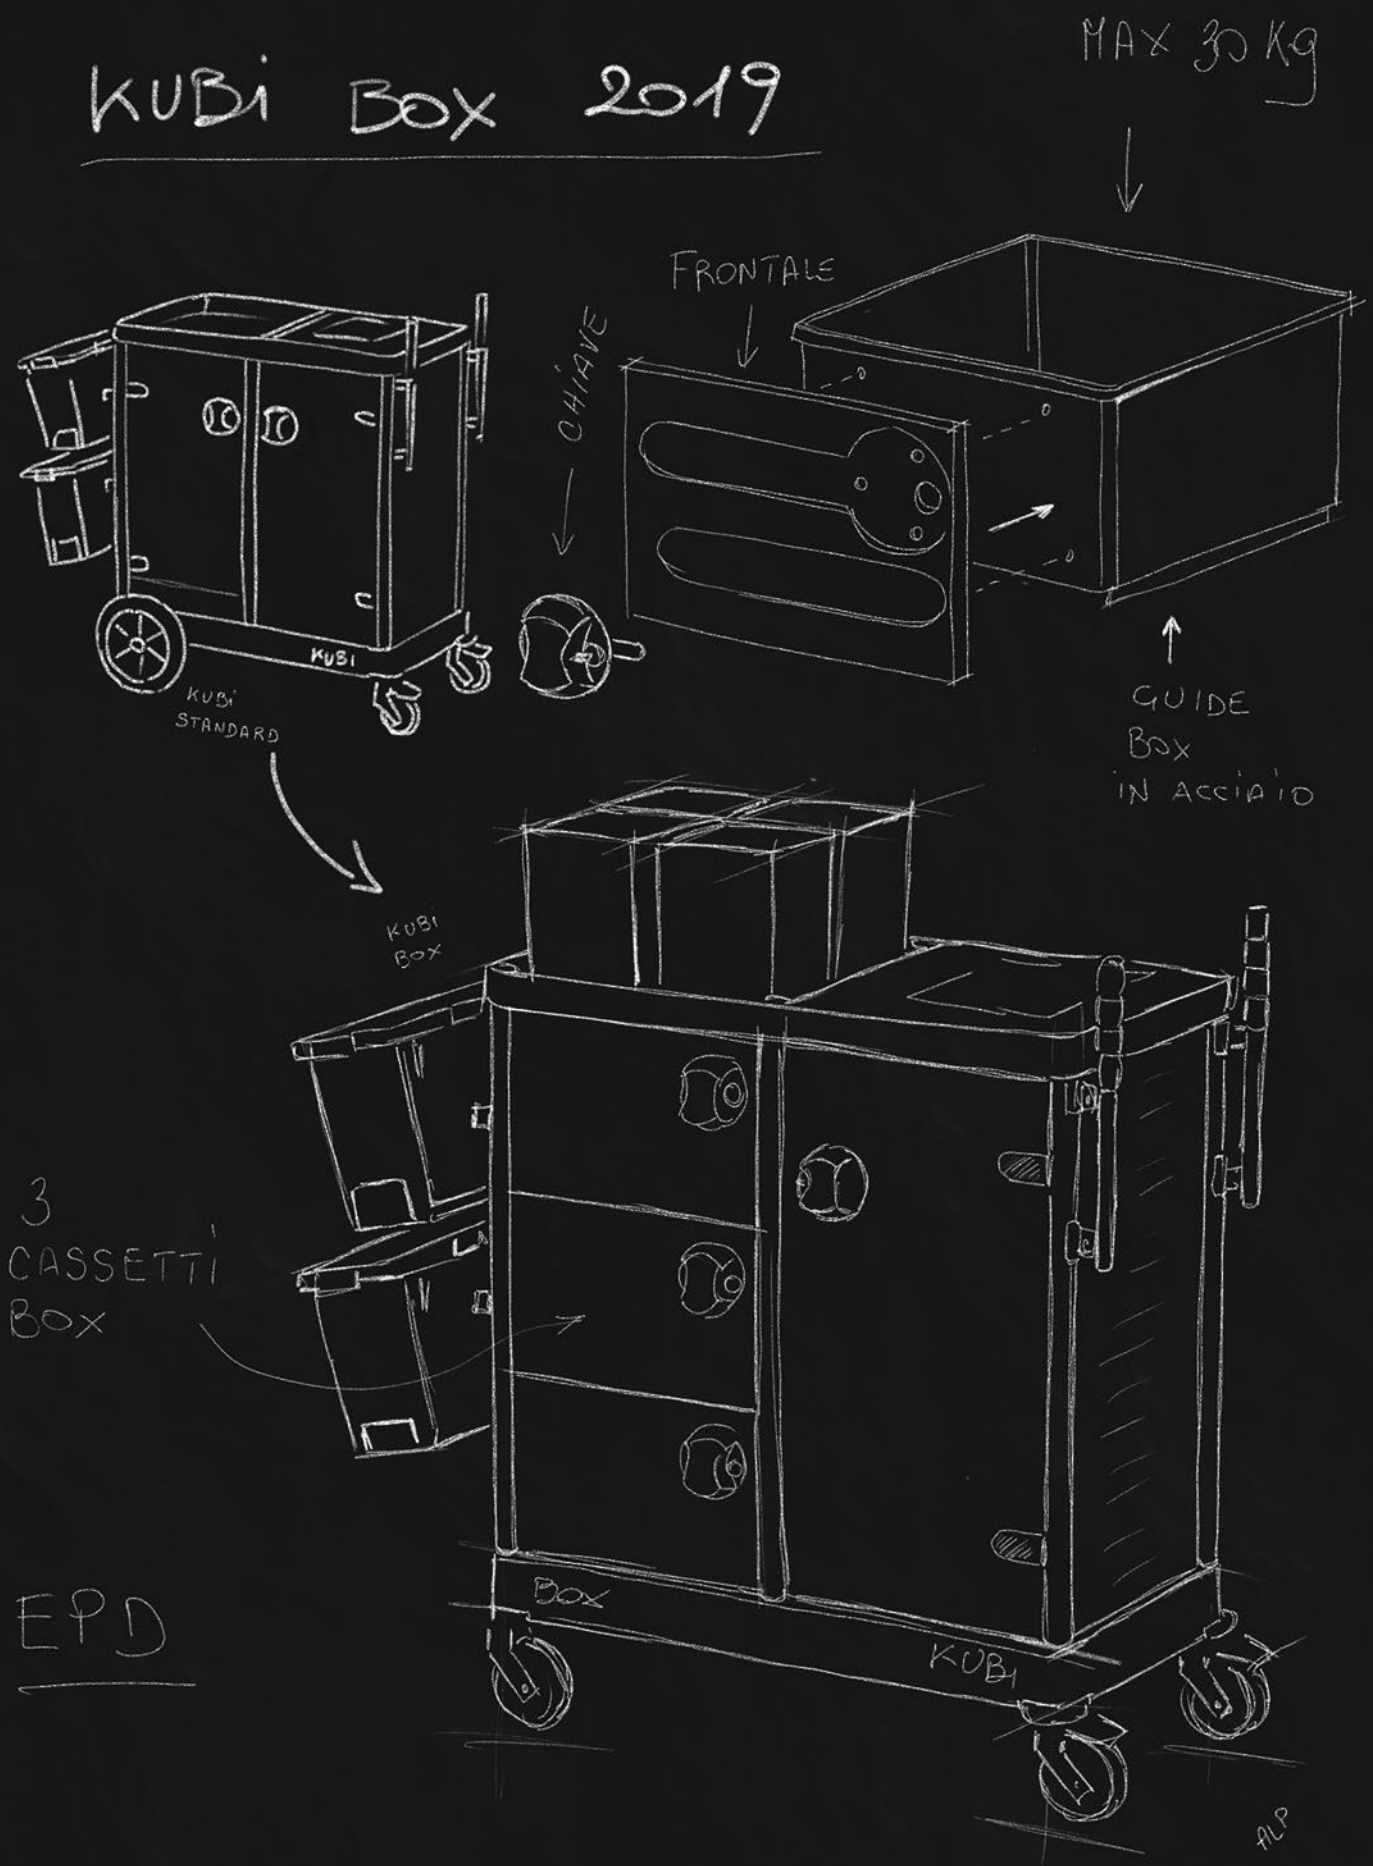
KUBI Box 2019



EPD

kubibox

Organize the materials transported inside of a drawers key-locked
it is now possible with KUBI-BOX!

The transport of personal effects could be efficiently separated from cleaning materials.

KUBI-BOX drawers are assembled on metal runners with cushioning mechanism.

They are designed and made for professional use and long life.

Customize your **KUBI-BOX** trolley from our website with our configurator:

https://www.falpi.com/it/configurator/kubi

To view prices you can contact us by mail at *info@falpi.com*.

Kubi-Box Minimal

The Minimal trolley is part of the KUBI range. Extremely compact, it exploits all available space to optimize cleaning operations while maintaining a neat and elegant appearance. Ideal for cleaning in restaurants, cafes, offices and, in general, in small environments.

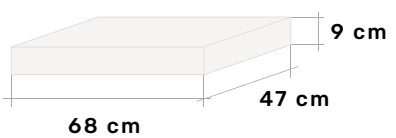
Kubi Fun

Kubi Fun is the new range of Kubi trolleys which is more compact than a Kubi Pro and more functional than a “double bucket” trolley.
With Kubi Fun it is now possible to choose a trolley with reduced dimensions able to maintain the same characteristics and quality of a trolley with a “*large*” base.

MEDIUM BASE



Set up your KUBI FUN trolley
https://www.falpi.com/en/configurator/kubi-fun

WHERE TO USE?

- Restaurants
- Toilettes
- Healthcare Facilities
- Hospitals
- Offices
- Fitness/Wellness Centers
- Schools/ Kindergartens
- Companies
- Swimming Pools
- Spa
- Campings

kubi fun

KUBI FUN...

... It allows you to use the *pre-impregnated* washing system, as required by the CAM (Minimum Environmental Criteria), occupying the same space as a trolley with a traditional system.

BASE SIZE: **cm 67x47**

BASE SIZE: **cm 77x43**

Kubi Fun

LIGHTNESS
The plastic and aluminium structure makes the trolleys both light and resistant.

FUNCTIONAL
Choice of high or low brackets as needed.

CONFIGURABLE
Fully configurable and customizable.

MANOEUVRABILITY
Wheels, mounted on ball bearings, are suitable for more challenging paths.

COMPACT
The compact structure allows you to use the vertical spaces.

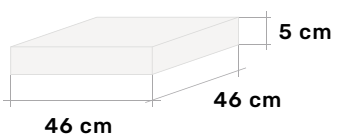
08 - Kubi Trolleys

Soli & Soli Pro

The *Soli method*, created specifically for the cleaning service in confined areas, can also be used in those non-sanitary contexts where a "*disposable cleaning method*" is required to limit the possibility of the spread of pathogens.

SMALL BASE



Set up your SOLI trolley

https://www.falpi.com/en/configurator/soli

Soli Pro **is a compact, maneuverable and functional trolley, with a tidy and professional appearance**. Soli Pro **takes advantage of vertical space by minimizing the footprint on the ground** to be able to move in tight spaces, including furniture and equipment; thanks to internal drawers and containers, it offers all the spaces necessary for positioning the equipment necessary for the service.
Distributed in Italy by Soligena (www.soligena.it).

Kubi Special

i-Kubi is equipped with large 305 mm wheels suitable for the heaviest use.
It is equipped as standard with a support shelf for the washer-dryer machine and a special shaped hook for fixing the i-Mop machine.
Customizable with the KUBI accessories line.

Kubi Robot is a trolley for transporting the Fimap equipment and machines necessary for the relidy operations, without tiring out the operators.
Kubi Robot Big-Foot is equipped with two large 305 mm wheels, suitable for the heaviest use, and two rubber wheels ø 150 mm.
By using the Kubi Robot Big-Foot trolley, the risks of occasional accidents during the transfer of materials to the rooms to be relided are eliminated.

Kubi Kid

Kubi Kid is Falpi's proposal for all those contexts frequented by children: from the pediatric wards of hospitals, to nursery schools, to children's centers.

It is available in all configurations of the Kubi range and therefore **maintains all the quality and performance certifications of the original line**.

In addition to the aspects of compactness, versatility and ergonomics, the playful aspect is also added here: the ability to customize the trolley with cheerful and colorful stickers.

kubi kid

The “all closed” design of Kubi allows you to keep chemicals and equipment away from the extraordinary and innate curiosity of children, ensuring their safety!

08 - Kubi Trolleys

Customizations tailored for Kubi trolleys

Kubi trolleys offer the possibility to be customized to perfectly align with the company's identity, combining functionality, aesthetics, and uniqueness.

With **forex panels** and/or **embroidered bags**, it is possible to integrate fully personalized logos, graphics, or text, ensuring a professional result that is consistent with the brand image, without altering the trolley's functionality.

Customizations are available for all Kubi models in the five colors of the range (lime, blue, red, orange, and grey), both for double or single body models, and for models with standard or high brackets. It is possible to integrate both the forex panel and the embroidered bag in the same trolley.

Example by the kind permission of Asterix - Bologna

FOREX PANEL ON KUBI - DOUBLE CABINET

The forex panels, designed to replace one or both sides of the trolley, allow for the integration of customized logos, graphics, or text, ensuring a harmonious result without altering the trolley's structure.

FOREX PANEL AND EMBROIDERED BAG ON KUBI - SINGLE CABINET

For trolleys equipped with a bag, it is possible to add embroidery directly on the fabric, providing an elegant and professional solution to enhance the trolley with company logos or text.

Inox Trolleys

Quick, light, stainless... strong: Falpi style!

Who works everyday in cleaning sector know perfectly that some instruments are daily friend in work and must be efficient, safe and "friendly".

Falpi's range of inox products is the result of "compromise less" technical choices exclusively aimed at the user's satisfaction. Entirely produced from inox AISI 304 using zero impact processing cycles, the INOX TROLLEYS for professional cleaning places all the quality of Falpi's experience at disposal of those who wants to make a long-term investment.

Also available in special versions for hospitals, industrial plants and communities, INOX FALPI TROLLEYS offer structural and ergonomic solutions that are unique and intended to increase speed, comfort and productivity of the cleaning operators.

The INOX TROLLEYS include the Microrapid system, which is undoubtedly the most imitated in the market.

174 - 193 Smart

09 - Inox Trolleys

Specialist

Made thanks to the experience of the consumers.
Solutions to the market are offered to guide it. It is uncommon that the operators lead it with their demands. Falpi stand out even in this choice!
We all along measures ourselves with the cleaning operators: they are our focus for the development of new products.
SPECIALIST are equipment designed to solve demands born on cleaning site in particular and extreme conditions. At the base of SPECIALIST there are always special procedures; the trolley is not, anymore, a single instrument, but the whole part of a complete system: an innovate approach of professional cleaning!
All the materials are completely recyclable.

Microrapid and Microtech

Semplicity is the real innovation.
It's been fifteen years ago from the first presentation of the cleaning system MICRORAPID: the first system impregnated... the more imitate!
All along these years we have changed the consolidate habits in the world of cleaning, working to perfect the product and improve the procedures to make them easier, efficient, respectful of the operators and environment.
Our efforts are always focused to simplify: for Falpi this is the real innovation!

Clean Room

Manufacturing processes which need to be carried out in clean room are constantly increasing.

Pharmaceutical, electronic and food industries, plastic materials production, research laboratories and many more sectors require a growing attention to cleaning processes, according to standards which can not be compared with normal procedures. Falpi proposes a range of Clean Room certified products in order to satisfy these specific needs.

This trolley is made in stainless steel and specifically designed for Clean Room use. It can be sterilized with high temperature autoclave.

Available only on order

Hotel

Where the elegance is important.

In certain contexts, besides practicality, aesthetics also plays a part. It was to adapt them the most prestigious environments that the Hotel Falpi trolleys has been created.
Among their strong points there are solidity, elegant steel structure and the possibility to be customised according to the customer's demands.

SOchic 1.1

The SOchic 1.1 trolleys come complete with front drawers and are all configured with the same medium base, two internal shelves, and standard brackets.

Their compact dimensions allow for easy use and transport, especially in facilities with limited space for maneuvering.

The SOchic 1.1 trolleys are available in three configurations, all in two color variations: wood effect or texture effect (anthracite).

SObasic Easy

SObasic Easy trolleys are the basic models in the hotel range, featuring 4 metal wheels ø 100 mm, two of which have brakes. They can be configured with a “large” or “medium” base, standard or high brackets, with or without a side bag holder, and with two or three internal shelves. This range of trolleys has been designed to meet the essential needs of hotels that still want to provide guests with a sense of order and elegance.

Accessories

Beyond the standard

Not everybody is satisfied of the standard: actually, our experience teaches us that many companies, as also many customers or single operators, want customised solutions with accessories and changes almost "tailor-made".

Only who, as Falpi, knows deeply this field, understands what the customer wishes, and is able to meet the particular demands.

To make the difference, in these cases, is our wide range of accessories which allows turning a standard product into your personal working bench, an instrument to feel as your own and use and "live" as a daily partner.

Eco-Friendly

When a technical choice becomes "responsible".

Sustainable development "meets the needs of the present without compromising the ability of future generations to satisfy their own".
(Gro Harlem Bruntland - Norvegian Prime Minister - 1987)

When being "ECO" was not trendy Falpi started a journey, not for business operation but for our natural vocation, to a sustainable production.
From over twenty years we have applied the concept of "sustainability" to our buildings, our technologies, and to the way to lead our company always and however!
Today, what we have always done for our inner certainty becomes, for many companies, Markenting operation: the "market" want it, the legislator requires it for the public authority, and we pursue it for belief!

EPD certified products

73 EPD certified Falpi's trolleys.

Many of the Falpi Inox trolleys can be proud of the environmental innovative label EPD.

We believe that communicate to the market the environmental value of a product must be always done basing on international schemes shared and checked by "Third Parties". With EPD certification we established the environmental impact of the certified products on the whole cycle of life: a new and modern way to communicate our effort for the environment.

CARBON FOOTPRINT
ISO 14067:2018

13 - Eco-Friendly

Carbon Footprint

73 Falpi trolleys certified on climate footprint according to UNI EN ISO / TS 14067 (Carbon Footprint).
Our trolleys, already EPD certified, of the Kubi, Microrapid, Microtech, Smart and Specialist lines, are now also certified on the climate footprint according to UNI EN ISO 14067 (CFP).
The methodology underlying the Product Carbon Footprint is based on the principle of responsibility towards the environment and transparency in the communication of results.
For this reason we have decided to make the emission values of the EPD certified trolleys available to all Stakeholders and undertake a path that will lead to an increasingly green and sustainable future.

Textiles

ECOLABEL EU certified

277 ECOLABEL EU certified Falpi's references.

Certify with EU ECOLABEL a textile product for cleaning is a difficult and challenging operation. A choice which Falpi made for 5 groups of products; a way which involved our Quality Office or more than four years.

Now Falpi can guarantee the maximum environmental compatibility on a wide range of its textile products and particularly on the washing microfibre mops...and this is just the beginning!

Wheeled Cabinet ECOLABEL EU certified

5 Kubi ECOLABEL EU certified.
In 2021, we decided to certify 5 Kubi models with the EU Ecolabel: a process that involved the Quality Office in a complex and challenging journey.

Thanks to this certification Falpi has also obtained the Ecolabel Award 2021 as Best Design Innovation for the Reduction of Environmental Impact, with the following motivation: "*The company has nominated the Kubi Pro Big-Foot Mobile Trolley for professional cleaning, recently EU Ecolabel certified.*
Article characterized by performance of physical resistance and exceptional stability.
It is innovative because it is made with materials that lead to positive impacts on the environment, through the longest possible life cycle of the product, without burdening production costs.
The Mobile Trolley is designed for disassembly, allowing repair, reuse and recycling.
This product is unique and innovative in the world of professional cleaning, in fact Falpi Srl is the only company in Italy to have certified EU Ecolabel this type of product."

Wheeled Cabinet Kubi Pro Big-Foot

ReMade in Italy certified products

54 ReMade in Italy certified Falpi products.

ReMade in Italy is the third-party certification that allows you to declare the content of recycled material, expressed as a percentage.

Falpi has decided to certify the dry containers of its trolleys, obtaining the environmental label on 54 products, for which the recycled material is greater than 50% of the total.

Tools

Small objects for big works

Less effort, more efficiency!

This is the Falpi Tools' slogan, designed and produced with the operator who will use them in mind.
A family which includes over 200 articles which, very often while passing unobserved, result in performing a top quality cleaning service. Every single tool is distinguished by its strength, efficiency, long life cycle, ergonomic look and easy to use; characteristics which allow for maximum cleanliness and hygiene in every environment.

350 - 351 Stand and stickers
352 - 356 Windows cleaning range
357 - 363 Tools
364 - 367 Unger
368 - 371 Ettore
372 - 375 Brosserie Thomas

Windows cleaning range

Falpi designed and created BILL, the revolutionary system based on microfibre use, which allows for an extremely easy, markless cleaning for windows and mirrors.

Everyone is able to clean easily and with excellent results, and this delicate task until now entrusted to “window expert cleaners” is today within everybody’s reach. Without having to use detergents but solely a alcohol based product even an inexpert operator can obtain amazing results.

Sales Conditions

Images and drawings included in this catalogue are for mere representation purposes and may change without prior notice. Therefore, when choosing the articles for orders, please refer exclusively to the price list in force.

DEFINITION
Following general sales conditions are applied for all the agreements stipulated between Falpi Srl and their Customers, save exceptions that must be expressly in the contact involved.

SOLD ARTICLES
The articles produced and marketed by Falpi Srl comply with the safety requisites and are suitable for use.
All data, weights, descriptions and images of the single articles contained in this technical catalogue are approximate. The tolerances of the measures are regulated by the mandatory standards.
Falpi Srl reserves the right to change, at any time and without prior notice, its articles as appropriate.

ORDERS
Customers must accept our sales condition before issuing a purchase order.
The order must contain the type of article and relevant code, quantity and delivery date.
Orders shall be considered as accepted only after receipt of confirmation in writing.
After 10 days without receipt of acceptance or delivery, the order shall be considered as rejected.
For articles sold by pack, the order shall be made for the entire pack, therefore orders for quantities lower than the minimum quantity contained in the pack shall not be accepted.
Minimum order amount for invoicing:
€ 500,00.

PRICES

Prices indicated on the catalogue are expressed in Euro and must be understand as net prices and ex factory Valdilana and/or Mottalciata. Prices will be applied if any change will occur in the price list. Prices of accessories and trolley spare parts must be applied just for purchase purpose and not for breaking down of details from products included in this catalogue.

PAYMENT

Payment of the goods are regulated by established agreements with Customer.
In case of delay of payment overdue
interest will be applied as considered by the law, with the effective date of the overdue sent to the debtor. In case of outstanding, bank fee will be charged; by the second outstanding payment, sales conditions will be modified as cash on delivery or advanced payment.
Goods sold by extended payment are considered transferred just by total payment.
The goods delivered will remain property of the manufacturer until Customer will pay the total amount.

SHIPMENT AND DELIVERY

The items are shipped both within Italy and abroad via courier. The shipping cost will be calculated based on the weight/volume ratio of the ordered items and the destination of the goods.
The items are delivered to the carrier in perfect condition and in packaging suitable for the nature of the item.
The volumes and weights indicated in this catalog refer to individual packages.
Delivery terms are not binding.
Delays in delivery do not justify any delay in agreed payments nor do they entitle any claim for damages.
Upon receipt of the goods, you are required to check:
- that the number of packages delivered matches the number indicated on the delivery note
- that the packaging is intact and has not been tampered with, including the sealing tape

In any case, the customer must always verify the integrity of the goods upon unloading. If this is not possible, they must write “SUBJECT TO INSPECTION” on the delivery document, which should be signed and returned to the courier.
In case of tampering and/or damage, the customer must immediately contest the shipment and/or delivery, stating the reasons on the delivery note to be given to the carrier.
The customer must report any damage within 7 (seven) days of receiving the goods.

WAY OF USE

Falpi Srl is not responsible for article defects or damages caused by improper use, non observance of ordinary maintenance as well as by tampering or changes thereto.

CLAIMS

The Client undertakes to check the goods upon delivery and to make any claims for damages or defects using the delivery note that shall be countersigned by the carrier.
Any defects shall be communicated in writing, also via fax, within the terms provided for by law.
Verbal or via telephone claims shall not be accepted.
No article shall be returned without the expressed consent from Falpi Srl.

NOT COLLECTION

The non-collection of the goods after thirty days from the agreed delivery term, shall cause the cancellation of the sales contact and Falpi shall have the right to hold by way of penalty all the amounts received until that moment, save grater damage.

DAMAGES

Falpi Srl shall not be held liable for any damages caused by the improper use of the products sold, failure to comply with assembly, usage, maintenance, or washing instructions, or damages resulting from tampering with or altering the products.

In the event of cancellation of the contract due to Falpi's fault, that is when a compensation for damages may be requested from Falpi Srl for causes ascribable to Falpi's responsibility as consequence of sale of goods, Falpi Srl shall not pay amounts higher than the value of the goods sold.

COMPETENT COURT
The court of Biella shall have exclusive jurisdiction to entertain any dispute arising from the goods sold, with expressed exclusion of any other courts.

USE OF PHOTOS AND PICTURES
The images, photos, drawings and in general any kind of representation of Falpi Srl's articles contained in catalogues, price lists, brochures and any kind of advertising materials are exclusively property of Falpi Srl, therefore their use whatsoever nature and means on the part of clients and third parties is strictly forbidden unless prior written authorization from Falpi.
Marketing and publication whatsoever kind and means of Falpi Srl's articles shall not be marketed and published under anonymous form, on the contrary it shall always be underlined that they are Falpi Srl's articles, unless otherwise authorised in writing.

PRICE LIST
This technical catalogue/price list cancels and replaces every previous edition.

ACCEPTANCE OF GENERAL CONDITIONS
The customer declares that he has read the general sales condition set out above and by sending the purchase order he also declares that he has accepted them as a whole.

TRADEMARK
Falpi Srl trademark, if showed on the items, shall never be removed, cancelled or covered by any means.
The Client's trademark, if any, shall be added to that of Falpi Srl in such a way so as to avoid any confusion with regard to the goods producer.

TRADEMARK USE
Falpi trademark and Falpi word have been registered and are property of Falpi Srl.
The use of Falpi trademark and Falpi word is just permitted to subjects qualified as operating Customers of Falpi Srl. Operating Customers are considered those who make at least one purchase along one solar year.
The use of Falpi trademark and Falpi word is permitted for advertising purpose and/or promotions just by written demand and courtesy of Falpi for the use indicated in the same to be sent to marketing@falpi.com.

PRIVACY POLICY
In the sense of GDPR n. 679/2016 the processing of personal data will be under the rules, following the principles of lawfulness and correctness in order to protect your privacy. Your data will be otherwise registered in the compulsory records for the purposes above mentioned, and will be communicate to the organisations in charge when will be necessary for legal obligations.

Edition 35

Valid from December 2024

DECLARATION OF CONFORMITY

All items manufactured by us comply with current safety material regulations and do not require product certification, as they meet the definition provided in Legislative Decree 206 of 06.09.2005.
Our products do not fall under any European Product Directives, specifically not under the Machinery Directive 2006/42/EC.

RC INSURANCE OF THE PRODUCT

The items offered by Falpi Srl are covered by Liability Insurance of Products agreed upon Allianz Spa N° 042939497.
